

<b>Table 1 2006</b>				<b>Transfused components</b>					
<b>TRALI case number</b>	<b>Sex /age</b>	<b>Diagnosis</b>	<b>Reason transfused</b>	<b>RBC</b>	<b>Plt</b>	<b>FFP</b>	<b>cryo</b>	<b>Incriminated component</b>	<b>Interval between transfusion and symptoms</b>
1	M/64	Waldenstroms macroglobulinaemia	To correct coagulopathy post plasmapheresis prior to removal of femoral catheter			2	5	Cryoprecipitate (2 units)	During
3	F/17	Gallstones, laparoscopic cholecystectomy	Post-operative bleed from liver bed	5 OA				None identified	Immediately after 5 <sup>th</sup> unit RBC
4	F/26	Caesarian Section	Post partum haemorrhage	5 OA		4		None identified	3-4 hours
5	F/28	Caesarian section	Post operative anaemia	3 OA				RBC OA	50 minutes
6	F/31	Bleeding ovary requiring emergency oophorectomy	Haemorrhage	5 OA		2		None identified	0-2 hours
7	F/35	Bleeding ovarian ectopic pregnancy	Haemorrhage	4 OA				None identified	0-2 hours
8	M/21	Fulminant Ulcerative Colitis	Bleeding from ileostomy	4 OA	2 aph	4 + 1 SD plasma		None confirmed –one RBC donor had granulocyte antibodies-concordance not established	0-2 hours
9	F/16	Severe scoliosis, cerebral palsy	Surgical correction with blood loss	8 OA		2		None identified	6-12 hours
2	M/83	Myelodysplasia	Thrombocytopenia		2 aph			Apheresis platelet	2-6 hours
10	M/77	Atrial fibrillation on warfarin admitted with confusion, probable sepsis	To reverse warfarin			5		FFP	Immediately after

**PROB INDEXED**

Table 1 2006					Transfused components					
Prob	TRALI case number	Sex /age	Diagnosis	Reason transfused	RBC	Plt	FFP	cryo	Incriminated component	Interval between transfusion and symptoms
1 HL	1	M/64	Waldenstroms macroglobulinaemia	To correct coagulopathy post plasmapheresis prior to removal of femoral catheter			2	5	Cryoprecipitate (2 units)	During
