* 2001/2002 figures covered a 15 month period. ** Total excludes 7 cases that were not classified CS=cell salvage autologous transfusion

† Number of TTIs reported to SHOT differ to those in the TTI chapter, which are now based on cases confirmed by the PHE Epidemiology Unit by year of transfusion, and may not all have been reported to SHOT. From 2013 onwards, SHOT will reflect the same number of reports as those investigated and confirmed by the PHE Epidemiology Unit

Table 2

Cumulative mortality/morbidity data 1996-2015

NB. TACO, TAD and autologous are new since 2008, and HSE and ADU were separated from IBCT in 2008. Alloimmunisation is new since 2010, and is now separated from HTR
