

SHOT Transfusion Safety Standards- Stakeholder Feedback Form

Thank you for taking the time to review the draft transfusion safety standards. These can be accessed here: www.shotuk.org/safety-standards. These have been drafted to ensure safe and effective transfusions by identifying risks, implementing strategies that create a safer environment for everyone involved. This will contribute to better patient outcomes, improved staff well-being and overall system safety. It is expected that compliance level against each of these standards can be recorded locally as either fully compliant/partially compliant or non-compliant with an action plan to address gaps when not fully compliant. Your feedback is essential in ensuring they are clear, practical, and effective in promoting safety. Please complete this form by **Friday 28 March 2025**. Do email us at shot@nhsbt.nhs.uk if you wish to discuss further regarding these standards. Thank you for your valuable input in shaping these transfusion safety standards. the SHOT Team

Stakeholder information

1. Name

2. Organisation or stakeholder group *

3. Please provide your email address if you are happy to be contacted to discuss your responses.

General feedback

4. Overall, how clear and understandable are the SHOT transfusion safety standards? *

- Very clear
- Somewhat clear
- Neutral
- Somewhat unclear
- Very unclear

5. Do these standards effectively address all the key areas for transfusion safety? *

- Yes, fully
- Partially
- No, they need significant revision
- Unsure

6. Please elaborate on gaps identified with these standards *

7. Do you agree with the content of the proposed set of standards? *

- Yes
- No

8. If you have answered 'no' to Q7, please elaborate on reasons. *

Clarity and comprehensiveness

9. Are any terms, concepts, or requirements unclear? *

Yes

No

10. Are there any areas included in these standards that should not be? *

Yes

No

11. Please provide any comments or suggestions to improve clarity and comprehensiveness of the standards.

Alignment with national guidelines and best practices

12. Do the draft standards align with current best practices and evidence-based guidelines? *

- Yes
- Partially
- No
